

**How to Wear a Kilt:**

Pleats go in the back. The flat part goes in the front.

Just like a jacket or a shirt, the left side folds over the right.

Make sure you are buckling on both the left and the right sides for proper security of the kilt.

Kilt should sit so that way when you're standing the end of the kilt is level with the tops of your knee (see image below for example).

**How to Wear Kilt Socks:**

Pull kilt socks all the way up.

Fold down the top portion until you hit a new texture.

Then fold the bottom up until the folded down portion is doubled up.

*Please ask wardrobe crew members for help if you need them to show or help you!  
Everyone has a different learning style and for me reading a how to would not be as helpful as someone demonstrating how to.*
